

# What is Tenant Development?

Stanley Nakamura, AIA (January 2018)

Tenant Development is the collaboration of professionals to accommodate a work environment for a client.

Tenant Development can encompass any size office suite environment.

Tenant Development work could have upgrades to the building standard lighting and mechanical system.

Tenant Development work may involve custom millwork to accommodate the client work environment.

Tenant Development work can involve office furniture selection for a client.

Tenant Development work can extend into the building common area such as the elevator lobby.

Tenant Development might have an impact on the building exterior signage.
