

# What is Architectural Drafting and Detailing?

Stanley Nakamura, AIA (January 2018)

Architectural Drafting and Detailing is the drawing component of a project using a software drawing program.

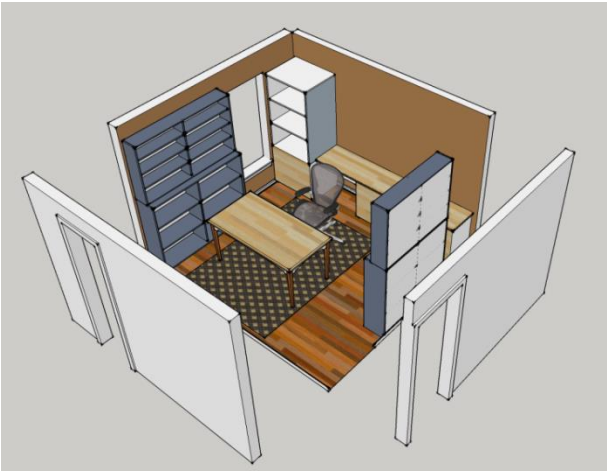

Architectural Drafting and Detailing varies depending on the size and scope of the project.

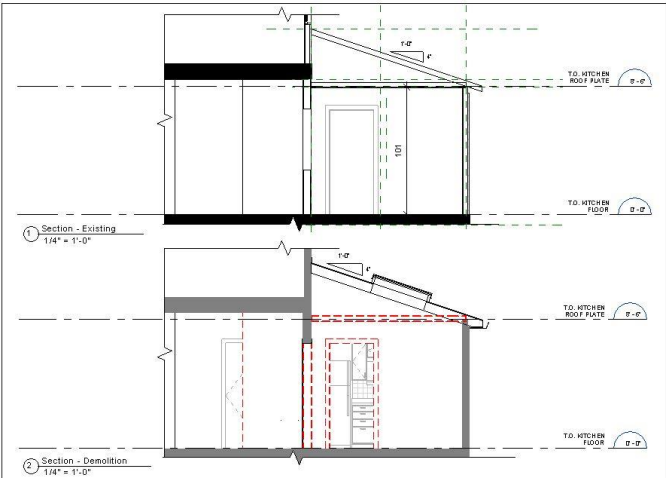

Architectural Drafting and Detailing might use Field Measuring of an existing space to start drawing.

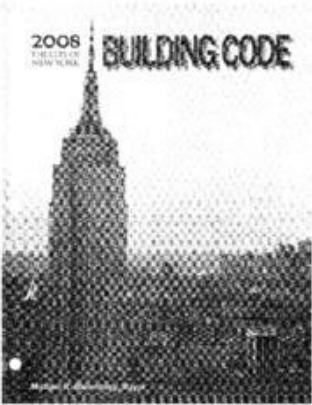

Architectural Drafting and Detailing might use a Space Plan as the foundation to start drawing.

Architectural Drafting and Detailing might focus on different components of a project.

Architectural Drafting and Detailing should encompass applicable building codes.

Architectural Drafting and Detailing when complete can develop into the Construction Documents.
